- *Authorized to work in USA.*

Professional Profile:

I am a strategic and seasoned Senior Technical Consultant and Software/Blockchain/Solidity Developer with a strong background in software engineering. My expertise lies in developing advanced technological solutions, particularly in JavaScript, Python, and Solidity. I specialize in quant projects in Python, smart contract development, and decentralized applications (dApps). I am actively seeking opportunities that challenge my skills and allow me to contribute to the development of future-emerging technologies. Recently, I've expanded my knowledge into data engineering and AI, to enhance the management and analysis of large datasets in technological projects.

Experience:

Senior Technical Consultant | Software/Blockchain/Solidity Developer

Miami/Bogotá | 6/2011 - Present

- Senior Technical Consultant with extensive experience integrating technological solutions in commercial and financial environments.
- Specializing in quant projects in Python, focusing on developing advanced financial tools such as back testing tools and trading bots for investment strategy analysis and execution.
- Advising clients on identifying opportunities for effective application of blockchain technology and software solutions, combining technical expertise and sales skills to deliver customized solutions.
- Developing dApps and smart contracts using Solidity, with an emphasis on creating decentralized solutions and financial applications.
- Acquired knowledge in data engineering and AI to enhance management and analysis of large volumes of data in technological projects.

Trader

T3 Trading Group | Oct 2010 - Oct 2011

- Experience in stock trading in dynamic financial environments.

Software Manager North of Latin America

SUN Microsystems(Oracle) Bogotá, Colombia | 01/2005 - 10/2009

- Sales strategies and business development for software products in Latin America.
